

# **Encompass Data Connect**

Get the most out of your Encompass data with Encompass Data Connect.

With access to your Encompass loan data in near real-time, Encompass Data Connect provides the data you need to build reports that include essential details for all of the mortgage loans you have in process, including specific information on application pull-through rates, underwriter turn times, and much more.

### Easy access to your data

Data Connect provides direct, fast access to your data, without impacting the performance or slowing down the speed of your Encompass production instance. You can identify new opportunities and optimize your business processes with the ability to:

- Get started quickly with pre-built reports and dashboards in Tableau,
   Power BI and Qlik
- Get three years of historical data right out of the box
- Reduce manual effort with automatic database schema updates synced with changes in Encompass
- Maximize existing business intelligence tools using structured data provided by Data Connect

## Easy data delivery

Data Connect allows you to access your Encompass loan data fields through the data delivery method that works best for your business:

- **Direct Write:** have your Encompass data delivered directly into your data warehouse and downstream applications for more flexibility and an enriched set of analysis.
- **Hosted:** consume data into your business intelligence tool via an ICE cloud instance, with no dedicated database administrator or extra data warehouse infrastructure needed. If you use Snowflake® to warehouse your internal data, you can enable Data Sharing within your Hosted instance, so you can access your loan data from within your own Snowflake account.

# 

Option 2:
Hosted

Data sharing

Snowflake instance provided by ICE

Data sharing

Lender's existing Snowflake instance
Snowflake instance

#### **Benefits**

- Access Encompass loan data fields in near real-time
- Run reports without impacting Encompass performance
- Reduce manual efforts with automatic database schema updates
- Maximize existing business intelligence tools

### Data and analytics services

Partner with ICE to achieve data capabilities through strategic planning services that employ business interviews, architecture reviews, and our experts' years of domain knowledge to develop actionable, executable roadmaps for data and analytics implementations.

## Kick-start your Data Connect investment with value-added services

The success of any data and analytics initiative can be measured by its ability to affect business change and drive growth. As you mature in your data journey, ICE Mortgage Technology services are here to help:

- Accelerated BI: get a quick start to shifting your business intelligence activities to Data Connect with the full implementation of ICE Mortgage Technology's pre-built, best practices report and dashboard templates in Tableau, Power BI or Qlik. These reports and dashboards are available to all users in your organization, not just Encompass users.
- Rapid Mart: take your data and analytics capability to the next level with full end-to-end, pre-built data mart implementation with ICE's Rapid Mart solution. Track your history (including hierarchy changes), conduct trending and time-series analysis, and integrate other organizational data into a single reporting schema.
- Data & Analytics strategic planning: no matter where you are on your data journey, ICE's data and analytics professionals can assist in business intelligence strategy, data warehouse strategy (cloud and/or on-premise), data governance, as well as provide tactical data and analytics implementation services. Let our team assist you in formulating, planning, and delivering end-to-end business intelligence solutions with Data Connect as the foundation including calling out possible risks, developing a reference model, prioritizing influences and initiatives, as well as identifying dependencies.

## Accelerate time-to-value for greater ROI

Today, many lenders find themselves struggling with high data maintenance and development costs that deliver only limited data visibility and availability. Encompass Data Connect is here to change that. Compared to alternative solutions that use SDKs or APIs to guery Encompass® production systems directly, Data Connect provides direct, fast access to your data, without impacting performance or slowing down the speed of your Encompass production instance.
